Next Generation Interactive Learning

DisplayNote, NEC Edition, is the latest interactive whiteboard tablet solution, which combines advanced collaboration tools with the market leading utilities available with NEC Projectors to create the ideal collective presentation solution for learning establishments. Users can present, share and collaborate ideas and presentations across all major platforms (Windows, Android, Apple, Linux and iOS) and any connected device, such as an iPad, Android tablet, smartphone, netbook or laptop.

DisplayNote's platform independent approach means you can fundamentally upgrade your presentation system's effectiveness without the need to replace hardware. Download Displaynote at www.nec-display-solutions.com/displaynote

DisplayNote NEC Edition operates in two main scenarios, a presenter scenario with powerful presentation and annotation features and the multi-user collaboration scenario which makes the learning process a fully inclusive class activity.

HIGHLY FLEXIBLE COLLABORATIVE SOLUTION

Works on all Major Platforms and Connected Devices

NEC Edition includes Additional Pre-Programmed Features that allow control of the Projector, Tools and Content via a Single Remote

Improves Collaboration, Presentation and Exchange

Multi-level features include Annotation, Highlighting, Drawing, Underlining and Adding Text, Notes and Images

Save Sessions and Reload them when you wish

Import Images from Photo Streams or live from an Integrated Camera

Free Presenter Licence provided with listed NEC Display Products*

FUTURE READY MULTI-USER PRESENTATION

DESIGNED FOR NEXT GENERATION LEARNING PRACTICES

DisplayNote has been designed to complement the new trend towards tablet based classroom solutions. Institutions that have already made the investment in whiteboard technology and tablet or portable devices for students can see immediate advantages in achievement and collaboration by adding the DisplayNote Solution.

DisplayNote is not only of interest to the Educational Sector, but it is also ideal for the Corporate Market as an intuitive and efficient training solution.

Today digital scripts are a firmly established part of the training process. Students can use DisplayNote to instantly connect with their teacher using the device of their choice, they can collaborate with fellow students, add their own notes and save and store their session on their device for future review.

Tablets and also PCs, laptops and smart phones can be connected to the teacher's PC via a wireless network. On all these devices the same software runs on a single user interface. Installation is straight-forward, a 'Host PC' is installed first, then the teacher starts a session and the students can log in.

DISPLAYNOTE SCENARIOS

DisplayNote is available with a number of different licence options that allow access to designated features and host and client connections.

There are two different scenarios for DisplayNote usage, a 'Presenter Mode' (a free download for customers who purchased a qualifying NEC Projector or Touch Display, or available by purchase) and a more advanced Multi-User scenario that allows multiple devices to connect and includes presenter functions and collaborative features for the whole class.

1 PRESENTER SCENARIO

The 'Presenter Scenario' is the standard application with intuitive presentation functions. It allows presenters to annotate over any surface, images, video, web browsers or office documents (ppt, word, pdf, etc).

DisplayNote also allows highlighting, drawing shapes, underlining important passages, adding text, notes and images and saving all this for future review as an image and/or as text. The teacher or presenter can use his or her device as a portable interactive whiteboard and to control the NEC projector, freeing them up to move around the classroom. The basic features for this mode are annotation and highlighting, the remote control of the teacher PC as well as the control of the projector.

With DisplayNote NEC Edition and an NEC Projector, the teacher can take full control via software, for example freeze the content or change signal input even if the projector's remote control is lost.

2 MULTI-USER SCENARIO

EFFECTIVE CLASSROOM COLLABORATION

The most powerful scenario however is the multi-user collaboration mode. Students can actively participate in lessons on a sharing basis.

Students can also take individual notes so that they have a personal version of the lesson to review when the lesson has finished or in preparation for exams.

1 Presenter Scenario

STANDARD FEATURES

Draw Shapes	Any Device
Highlight	Any Surface
Annotate	Any Document, Image/ Video etc
Save Sessions	Integrate to Office and PDF Files
Add Text and Images	Presenter Remote Control

2 Multi-User Scenario
