BETTER MEETINGS, ANYWHERE

WHO WE ARE

Re Mago

Valarea is developed by Re Mago Ltd, a software and collaborative solutions company headquartered in the UK with branches in the US, Switzerland and Italy.

We are believers and promoters of business that is not imprisoned behind walls.

RE MAGO

OUR STORY

A strong foundation

- ✓ 8 yrs in meeting software industry
- ✓ 6 yrs in the OEM market
- ✓ High development skills in software for touch interactive displays

We have been active for the last six years developing interactive and smart meeting solution for several of the leading display and projector manufacturers in addition to our own branded solutions.

PRODUCTS

Valarea Room

Enhance the experience of your meeting rooms with a complete solution suitable for any hardware and software already in use.

- ✓ Multi video conferencing BYOM
- ✓ Wireless screen sharing
- ✓ Wired / Wireless Touch Controller
- ✓ Digital signage, kiosk mode, visual workspace
- ✓ Single perpetual license for any room type
- ✓ Bring Your Own Device with Valarea App
- ✓ Cloud monitoring, management and analytics with Valarea Console

VALAREA ROOM

Multi-video conferencing, the freedom to choose.

Valarea Room enables your meeting rooms to BYOM (Bring Your Own Meeting) with multiple video conferencing systems in a single solution.

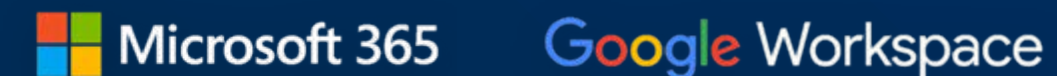

Start an instant meeting via Microsoft Teams, Zoom, Cisco Webex or Google Meet and invite participants with a simple, unified experience. View scheduled meetings on your room calendar and join them with a single tap. Haven't you booked the room? Transfer your personal calendar (QR Code, WiFi or bluetooth) via the Valarea app and take control of the meeting room in seconds. Control the room display with the multi-gesture trackpad, access your cloud drives on the big screen and start your personal meetings using the room hardware.

Valarea Room supports Microsoft 365 and Google Workspace calendars, automatically recognizes and supports more than 20 video conferencing systems, such as BlueJeans, Lifesize, Join.me, Pexip and many more.

* For the VC systems listed, there is no need to purchase specific meeting room accounts or subscriptions. Free and standard accounts are supported.

VALAREA ROOM

Wireless screen sharing, simple and instant.

Instantly and easily share your personal device screen with meeting participants. No need to connect cables or install any third-party app.

Any device, with superior quality

Valarea Room supports up to 8 Apple, Android and Microsoft devices simultaneously, thanks to the native AirPlay, Google Cast and Miracast protocols. View and share your content in 4K quality at 60fps.

Compatible with other USB / HDMI systems

Is your meeting room already equipped with other screen sharing systems (eg Barco)? No problem. Valarea Room integrates with your existing hardware by unifying and simplifying the screen sharing experience.

Proudly powered by  AirServer®

VALAREA ROOM

Remote touch control, an extra comfort.

Control Valarea Room comfortably from the room table: join meetings, manage audio and video, enable screen sharing, start applications and more.

Choose from one of the compatible wired touch controllers (Lenovo and Poly) or enable the wireless experience thanks to the Valarea app (Wireless Touch Controller license) on an iPad device / Android tablet.

Choose your favorite controller

Valarea Room supports wired touch controllers from top manufacturers such as Lenovo ThinkSmart Controller and Poly GC8.

Discover the wireless option

Do you want an even more versatile experience? Install the Valarea app on an iPad device or Android tablet and use it as a wireless room controller, thanks to the Valarea Wireless Touch Controller license.

VALAREA ROOM

One license for any type of room, forever.

Valarea Room can be installed on a wide variety of Windows 10 PC / NUC / OPS (e.g. Lenovo, Dell, HP, Intel) and supports any display or projector configuration (interactive or passive, single or multiple, vertical or horizontal, videowall).

In any case, the Valarea Room license is single and perpetual, regardless of the number of displays and the size of the meeting room.

VALAREA ROOM

NEW !

Smart dual monitor view, better presentations.

Automatic window management

Thanks to the smart dual monitor view feature, Valarea Room automatically arranges the application windows to show videoconferencing and participants on one display, while screen sharing or whiteboard content on the other.

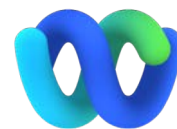

Better presentations, better meetings!

The presenter can interact with participants without losing focus on the content such as screen sharing, a document, a blackboard, a website, ...

Optimized out of the box

Valarea Room smart dual monitor view is optimized out of the box for Microsoft Teams, Zoom, Webex and Google Meet video conferencing systems.

PRODUCTS

Valarea App

Valarea fully supports BYOD thanks to its companion app, available for Windows 10, iOS, macOS, Android and browsers. Standard version free forever.

Proximity connection via QR code or automatic discovery (Wifi or bluetooth) enables:

- ✓ Transfer of personal calendar and Cloud drives
- ✓ Multi-gesture trackpad control
- ✓ Multi Video Conferencing one tap to join
- ✓ Transfer of personal Valarea Workspaces

VALAREA APP

A workspace for powerful presentations.

Valarea App features a powerful built-in collaborative workspace for real-time presentation.

Any file type

Participants can interact sharing any file type: images, videos, documents, MS Office documents, websites, 2D/3D models, AR objects and DICOM images.

Automatic meeting recap

A meeting recap can be shared to all participants when the meeting ends.

Additional features

- AR Camera
- Document scanner
- DocuSign integrated signature
- Chat and file sharing
- Built-in seamlessly integrated video conferencing

PRODUCTS

Valarea Console

Remote management, monitoring and analytics.

Management

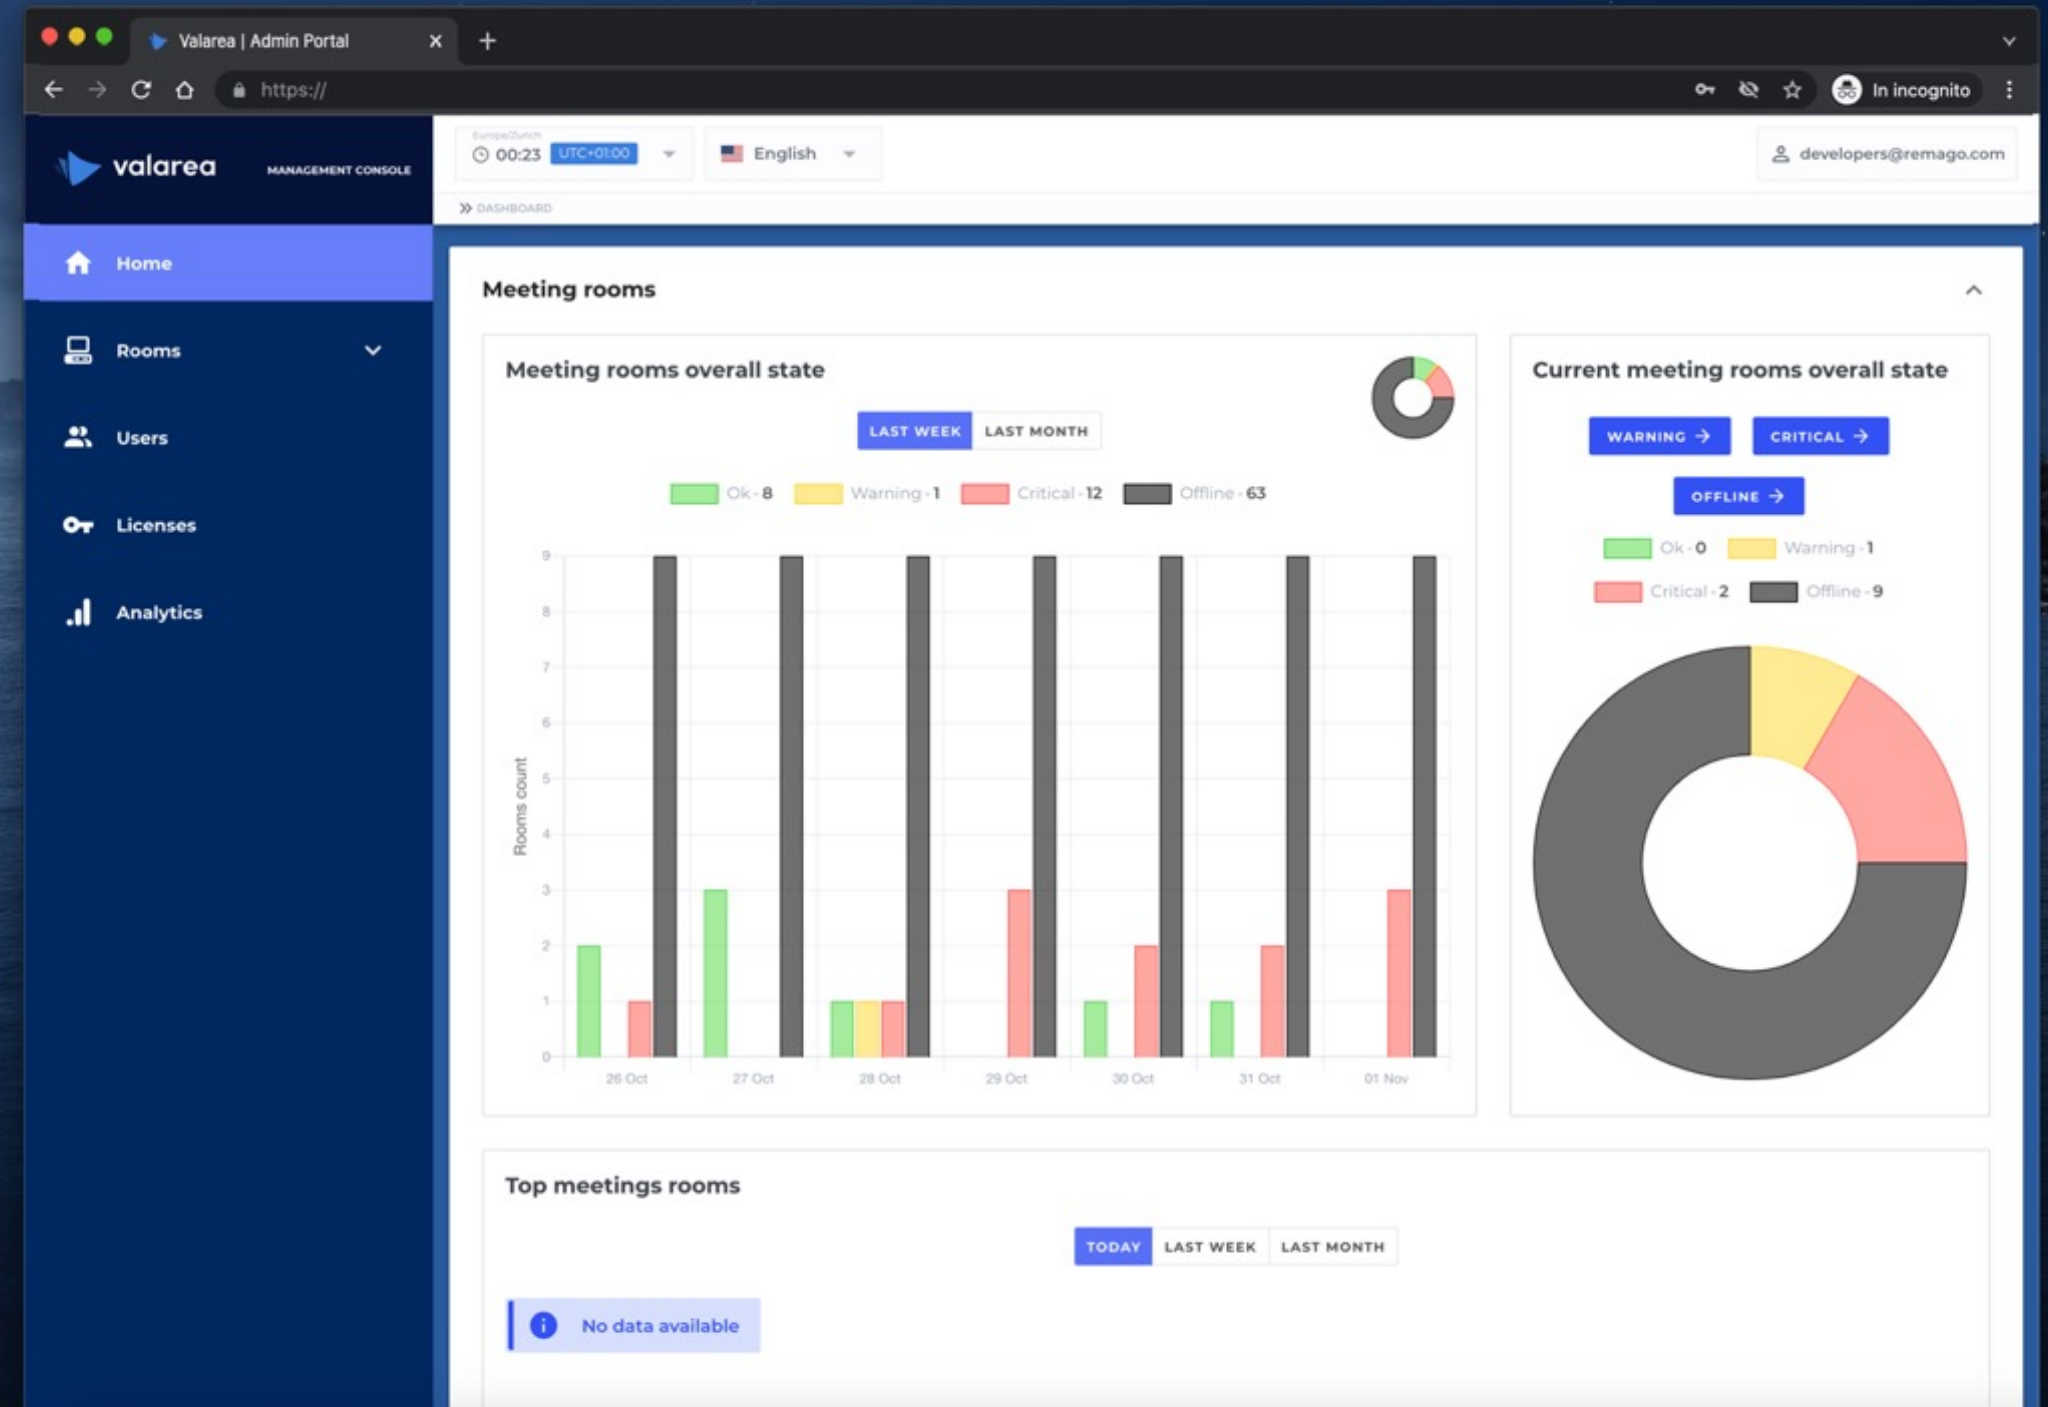

Remotely manage licenses, settings, policies and hardware of Valarea Room meeting rooms.

Monitoring

Monitor the health of the rooms in real time to intervene remotely in case of need.

Analytics

View analytical data to better understand the use of your meeting rooms and drive better decisions in setting up and equipping spaces, saving on TCO and optimizing investments.

Available on Cloud or On Premise.

VALAREA CONSOLE

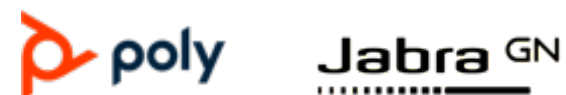

Powerful insights, better decisions.

Valarea Console enables organizations to get insights correlated between UC platforms, rooms and people. Being able to analyze data at this level allows organizations to understand communication trends and patterns that can help them drive their business more efficiently and cut costs.

The Valarea Console analytics platform leverages data on the meeting room infrastructure, sensor information and meeting room equipment to reveal trends and optimization opportunities that are obscured by disparaged meeting and scheduling systems.

Valarea collaborates with the best manufacturers of smart hardware for meeting rooms in order to provide seamless management and key analytics to IT managers.

Valarea Console integrates with smart hardware from
